

IN THE SPECIFICATION:

The Examiner has objected to the abstract of the disclosure as including legal phraseology, specifically the phrase "said bodies". Accordingly, please replace the existing abstract with the abstract attached as attachment A.

The Examiner has objected to the use of the term or lack of the term "yoke" in the specification. Please amend the paragraph starting on page 15 line 13 as follows:

FIG. 3 shows a carrier segment with the inserted winding carriers 4. The winding carriers 4 are connected with the carrier segment via the plug pins 10 in a detachable yet operationally safe manner. Within the yoke 20 of the rotor on the inner circle of the carrier element 2, provision is made for the recesses 13 for receiving connecting pins not shown here in detail.

Additionally please replace the sentence at paragraph 3 of page 17 with the following rewritten sentence:

The winding carrier 4 can be identically employed for the carrier segment 33 of a linear motor according to FIG. 47 or for the carrier segment 34 of a rotational machine according to FIG. 8, whereby the basic profiles have to be adapted in each case in view of the circumference of the given machine.

Please add the following paragraph to page 20 line 13:

20 Yoke section of receiving body
